Technical Skills

Development Currently I'm using **Python** (numpy, pandas, sqlalchemy, matplotlib), loving **Julia** and learning **Nix**, **Linux** user since 2009 (Bash/zsh for scripts and oneliners, system management, remote server administration via **SSH**)

Can write complex **SQL** query statements (with analytic/window functions, subqueries, optimization etc.) and do simple DBMS management in both SQL-like and **NoSQL**

Able to work with **Docker** and other containerization tools, used Docker container as an environment to compile MATLAB package with external dependencies including OpenCV via CMake

Designed a **AWS** architecture for a **IoT** application (smart lamps for green houses)

Built a simple **IoT** showcase using Docker

Familiar with **MATLAB**, learned **JS** and **C/C++** a long time ago (can read and write not to complex code)

Fan of cryptography and self hosted solutions
